THE JUBILEE BEGINS.

To-day ushers in the Centennial festivities century of constitutional government is d and another century begun under nces most auspicious.

The eyes of the world are on New York o-day, and the spectacle to be here prented is unequalled in the world's history. From WARHINGTON to HARRISON, what won

ous changes have been wrought! Where there was weakness now is strength, where was poverty is wealth, and what was then hope is now realization, only a hun-

dredfold surpassed. But the significance of this celebration is

not merely National. It concerns all mankind. It climaxes a century's evidence that constitutional government is a success bewond the dreams of its founders. This celebration brings into clear relief the

narcation between the old civilization and the new. It is more significant of the future than it is commemorative of the past.

There's a potent hint to Europe and all onarchial-ridden lands in this Cer cannial of the people's government.

DOUBLE INSPECT EVERY STAND.

It is claimed that every public stand has been thoroughly inspected. But it can do no harm to have all possible points of weakness in these structures subjected to all possible tests to-day.

As for the private stands, the Police Captains should be instructed to inspect to-day every one put up in their precincts.

Let us take no chances on accidents to

THE PEOPLE CAN BE TRUSTED.

After an hundred years of experience under all manner of conditions, in prosperity and adversity, in peace and war, it has been demonstrated that the American people are equal to any emergency.

They can be trusted to manage themselves, which is the highest praise that can be given a nation as well as a man,

The flagship Albert Gallatin. Capt. C. Abbey commanding and commodors of the division of revenue cutters, came next, heading the cutters U. S. Grant, Hamuel Dester, Manhattan, Alexander Hamilton, Washington and W. E. Chandler. Dandler. This column was a magnificent one and ex-tended for nearly four miles.

THE MERCHANT MARINE COLUMN.

The merchant marine column, next in order and lying east of the naval vessels, was headed by the flagship F. W. Vosburg, having on board Rear-Admiral F. W. Vosburg, having on board Rear-Admiral F. W. Vosburg, Fleet-Capt. Peter Cabill, Fleet-Lieut, I. L. De Noyes, and Fleet-Secretary George L. Foote.

This column was divided into five squadrons, the first being commanded by Commdore Isaac L. Fisher, tug Fannis P. Steer; Second Squadron, Commodore William H. Hooker, tug Fred C. Ives; Third Squadron, Commodore William H. Hooker, tug Fred C. Ives; Third Squadron, Commodore William C. Edgerton, tug Howard Carroll; Fourth Squadron, Commodore Charles A. Pool, tug Ivanhoe; Fifth Squadron, Commodore Charles H. Boyer, tug S. R. St. John.

To give the names of all the steamers and tugs in this division would require unlimited space, but suffice it to say that over one hundred and fifty were in the line, which stretched over seven miles.

On the Channel's West side.

ON THE CHANNEL'S WEST SIDE.

The Second Division of the merchant marine on the west side of the channel, next to the naval vessels, was headed by Rear Admiral J. W. Miller's liagship. S. L. Crosby, which had or board Fleet Capt. Jesse Mott. Fleet Lient. J. Frederic Tams and Fleet Secretary Richard

Emmons, steamboat William Fletcher; Eighth Squadron, Commodore L. Luckenback, tig Ocean King: Ninth Squadron, Commodore R. C. Viet, tig Astral; Teuth Squadron, Commodore M. Moran, tig J. A. Dumont.

Over two hundred vessels were in this division, which, however, was not as long as the First Division, being composed of smaller boats and anchored closer together.

AN ARMY OF SMALL BOATS IN THE REAL. Then in the rear and on the sides was gathered an army of small beats and sailing craft of all descriptions, so covering the water that the bay looked like a solid mass of glistening black

This was the scene, pure and simple, and one that will probably hever be witnessed again.
All day long the little tugs, bearing commanders of different divisions, steamed in and out, giving orders here and there. Vessels were shifted and shifted and seemingly everything was in confusion.

By 11 o'clock, however, everything was in place and every eye and ear was strained towards the Kill von Kull.

the Kill von Kull.

It was weary waiting and anxiety of the occa-sion made the minutes seem like hours.

A GUN'S DEEP BOOM.

Suddenly the deep boom of a gnn arose above the hissing of steam and the swash of steamers paddles. Instantly every man in the vast fleet was on the alert for orders. The gnn was the signal from the tug Nina, anchored in the Kill Von Kull and it meant that the Despatch, with the Presidential party on board, was opposite Port Richmond.

Then another report from a cannon set every one in action. This was the signal from the Chicago for all caseds to heave up anchors short and prepare to move.

THE DESPATCH HOVE IN SIGHT.

Hardly had this been accomplished when the Despatch hove in sight. Following close in her wake was the Erastus Wiman, the Sirius and Monmouth, filled with invited guests and their families.

The flagship of the merchaut marine, the ferry-host Bergen, which left Hoboken early in the morning with Vice-Admiral Woolsey, Fleet Captain D. M. Munger, Fleet Lieutenant Leon Abbett, fr., and Secretary J. J. Bergen, brought up with the Nina in the rear.

A GREAT FIRING OF CANNON.

A GREAT FIRING OF CANNON.

As the little warship emerged from the Kill Von Kull, the yacht cannon began to boom in quick succession, the rearmost yacht beginning first. The National salute, twenty-one guns, was fired.

Soon there was a perfect roar of cannon, big and little, and clouds of thick, white smoke hung over the bay like a bank of sea fog. Belches of fire fisshed through the smoke like streaks of lightning, giving to the scene a lurid glare.

The scene was a stirring one. Faintly above the roat of the cannon could be heard the shrill pipe of the boatswain whistles on the revenue cutters, yachts and men-of-war.
In a trice sturdy tars manned the yards and crosstrees, and with heads uncovered, gave hearty American cheers as the Despatch steamed

The officers stood with uncovered heads. As the Despatch came opposite the flagshus of the different squadrons, the latter, one on each side, steamed out and accompanied the war-ship the length of the squadron. Then colors were dipped and a deafening screech of steam whisties was blown.

A TREMENDOUS DIN OF WRISTLES.

As the Despatch came opposite the Chicago, the entire fleet of over-four hundred steamers blew their whistles She passed the Battery at

12.20.

It made a tremendous din, coupled with the incossant gun-firing and was kept up for three or four minutes, although the scheduled limit was only half a minute.

On went the stately war-ship up through the channel and into the East River, where she came to anchor off the foot of Wall street. ANOTHER SIGNAL GUN.

As soon as she had got well into the river a signal gun was fired from the Chicago, and anchors that had been hove up short were got on board with alacrity.

THE NAVAL PARADE. THE NAVAL PARADE.

Then began the real naval parade. The sight of hundreds of vessels of all kinds was one that will long be remembered by the thousands of people who lined the docks and housetops along the river front of the Hudson.

Almost every steamer of any size had a band of music aboard, and the number and variety of airs that floated ashore on the hazy air were something remarkable.

The Chicago steamed on until opposite Thirty-fourth, when another gun was fired. This was the signal for the yachts and cutters to disperse, and like a huge flock of swans they gracefully heeled around and speci down the bay to their various anchorages. Then the naval vessels came to anchor off Fifty-tirst street.

A OBEAT ABBAY ON THE EAST RIVER. Meanwhile the merchant division was doing the grand on the East River, both divisions combining into one. combining into one.

Led by the Bergen they steamed up the river, a literal mass of bunting and flags.

The flagship turned a stake-boat just below the rocks at Hunter's Point and then came down the west side of the river, round the Battery and up the east side of the Hudson.

ALL FLAGS TO FLUTTER AT SUNSNI.

At supret to-night all flags will flutter to decks nd a National salute will be fired by all the war

There were many incidents in the procession.

Captains of certain vessels would dodge here and there to get better positions, and the fleet captains were nearly exasterated. However, everything went off very smoothly for a parade on the water, and great credit is due to the management. due to the management.

It was a grand parade and one that will probably never be witnessed again by the present

A BIRD'S-EYE VIEW OF IT.

THE NAVAL PARADE DESCRIBED FROM A

BUILDING'S TOP.

The huge naval demonstration which ushered n the Centennial Triduum of National Exultation presented an unparalleled spectacle to a spectator on one of the towering buildings of Battery which overlook the bay.

Through the courtesy of Mr. Clarke, whose office is on the sixth floor of the Washington Building, the reporter of THE EVENING WORLD anjoyed a magnificent view of the pageant. Far below was the Battery, with men, women and children clustered ajong the sea-walls in such dense masses that they looked like an the park. The surrounding buildings were

shick with speciators except the big square tower

of the Produce Exchange, which was perfectly

bare.
'The President of the Exchange can't get on the reporter.

The green waters of the bay were dark under the thick clouds of the morning which seemed to threaten rain. But the clouds broke, and a ravishing blue sky looked down benignantly on the myriad

oraft, later on, making the rippling waters sparkle like diamonds in the lavish splendor of

Every sort of thing that sails was in New York bay this forenoon waiting for President Harri-son to steam out of the Kills and take his course

The big men-of-war were drawn up inan imposing line, a brilliant showing of flags, buntposing line, a brilliant showing of flags, bunt-ing, pennants, and every partg-colored drapery that could finiter and toss on the April breeze encircling each of the big vessels.

Below and around them, stretching down to the dim shores of Staten Island were steamers, tugs, excursion boats, yachts, sailing vessels, dredgers, transports, every sort of thing that could float, even down to the tiny skiff of the Venturesome oarsman.

There was a tendency on the part of the stu-pendous fleet to drift towards the Kills, whence the Despatch was to emerge with the President of the Republic on board.

It was a mass of bristing color.
The large white Boston loomed radiantly up at the end of the line of men-of-war, of which the Chicago was the nearest to the Battery.
Beyond and around were the gayly decorated vessels so thick that the bay seemed solid.

Towering above all this imposing naval array was the serene Godless of Liberty, too beautiful to need any decorative touch, stretching aloft her torch above the scene with an air of dignified benediction.

From the salute of the nine men-of-war at 8 in the morning, which opened the Centennial festivities, no sound of hilarious gunpowder was heard till past noon.

Then the solemn boom of the gun which announced the advent of the Despatch in the upper bay came over the waters.

LIBERTY TOWERING ABOVE ALL.

bay came over the waters.

A thundrous acclaim followed, and the yards of the line of men-of-war were manned by the men. Then the predigious fleet closed up on the President's boat and the whole overwhelming pageant steamed up the bay.

ON HER DECK STOOD THE PRESIDENT.

The Despatch was gay with flags and bunting, and on her deck stood the President,

CASTLE WILLIAM BANGS A WELCOME. Castle William Bangs a Welcome.
Castle William banged a biatant welcome. The Garrett was close at hand and the Patrol, the police boat, under Capt. Amiti's gallant guidance. Bang's went the cannon and the rumbling thunder shook the air.

The Despatch steamed up along the line of the men-of-war and she reached the Chicago at the top end of the line. Then she turned and forged slowly along to the East River. All the craft came steaming up on her heels, crowding thickly around her rear.

THE PATROL WAS THE NEAREST. THE PATROL WAS THE NEAREST.

The Patrol was the nearest, then the Erastus Wiman, with the overflow of the Presidential party on board of her and a growd that seethed and overlapped her brown rails.

The stately double-smoke-stacked Moumouth was a close third, also weighed down with living freight. Then countless craft of all kinds deflied past the Battery in the wake of the Despasch.

THE RIVER WITH A PLEET NUMBERING THOUSANDS. THOUSANDS.

Thus, amid the booming of cannon, with a fleet numbering thousands, the President made his way up the bay to the East River, where the lusty caremen pulled him to the Wallstreet pier. His progress up the bay in all the dignity of the ruler of the greatest of republics was now a matter of history,

Wall street was simply gorgeous with its decorations, and not a single building along the whole route of the Presidential procession was without its appropriate decoration.

The fronts of most of the buildings on Wall street were completely covered either with draperies of red, white and blue bunting or hundreds of small flars.

The Custom House, Stock Exchange, Subtreasury, Drevel & Morgan, Manhattan Bank and insurance buildings were especially magnificent in their decorations.

From the foot of Wall street the view up towards Trinity Church, as well as up and down South street, where the forests of masts of the big vessels were fluttering with flags of all nations, was superb.

broad arch of National colors, and thus usher-

ing and sailors taking warning was forcibly suggested.

The skies were heavily overcast with dark heavy clouds, and after his first sportive attempt Old Sol disappeared again and hid himself as he has been doing so effectually for the last three or four days.

Although the Clerk of the Weather had decided that there would be bright sunshine today, and Prophet Devoe had given his absolute assurance that no rain clouds would mar the enjoyment of the three days' celebration, it looked very much as if the powers of the upper air had decided differently, and that anticipations of fair weather were going to be disappointed.

Still, the rain held off, and at 9 o'clock there was a very encouraging brightening up of the skies.

LOOKING AT THE DECORATIONS.

They had come out first of all to take a look a the decorations with which the big city had adorned itself, and then to secure good places from which to witness the demonstration which was to take place downtown later in the day.

All along the upper part of Broadway and Fifth avenue the sidewalks and even the read-ways were througed with people during the morning hours.

They crowded and jostled each other around the neighborhood of Madison and Union squares, so that the street cars had no little

A JAM AT FIFTH AVENUE AND TWENTY-THIRD STREET.

At Pifth avenue and Twenty-third street there was a regular lam, and a repetition of last night's scenes, only on a larger scale. Among the multitudes were thousands of soldiers in the uniforms both of the regular army and the State uniform from all parts of the country, bent upon taking in sil the sights of the town before their big day's work, which will come to-morrow, and after which most of them will probably be tired enough to go right to bed and take a rest.

CELEBRATING AHEAD, CELERBATING AHEAD.

A good many of them were out all last night, celebrating in the customary way, but they seemed to be none the worse for it this morning. The hotels, as a matter of course, are crowded to their utmost capacity, and the boarding-houses about town are rapidly filling up.

The proof of this is the vast number of strangely attired people to be seen mingling in the crowds uptown. They all seem to be enjoying themselves, wondering at and admiring the new sights which they see, and they are welcome to town.

new sights which they see, and they are welcome to town.

Gotham is doing its level best to give each and every one of them the best possible time, and there are very few of them who will go away disappointed. PEW DOWNTOWN BUSINESS PLACES OPEN.

Later in the forenoon all ways led down towards Wall street and the Equitable Building, where the first ceremonies in the great celebration are to take place. Very few business places downtown are opened to-day exept for the convenience of sight-seers, who will occupy every vantage point along the route of the procession up Wall street.

One or two of the exchanges were open during the morning hours, but no business to speak of was done, while everything in the neighborhood of the great financial centre of the country wore a gala aspect.

THE CITY'S DECURATIONS.

Fings and Banners Fluttering in the Breeze on Every Side.

To one looking over the roof-tops of New York from the centre of the Brooklyn Bridge, the air seems to have blossomed with flags. As far as the eye can see a thousand banners are floating bravely like the standards of some vas army.

The shipping on the rivers are like brigh lines of color. Every craft is decorated from topmast to hull with the flags of every nation. Even the canal-boats towed around the Battery have a gayety of appearance that would do credit to a yacht. While the scene on the water is brilliant, that

While the scene on the water is brilliant, that on the land surpasses it.

The City Hall has covered itself with glory and is as bright as a field of lilies. Above it floats a new flag with forty-two stars, the first one ever raised over it with the four new States twinkling in the szure of the standard.

The Post-Office is elaborately decorated withat thousand flags, and above it also floats a new banner with forty-two stars.

thousand flags, and above it also floats a new banner with forty-two stars.

The front of The World building is handsoniely adorned with flags and bunting. St. Paul's Church presents a gala appearance, while a single flag flies from the tall spire of Trinity. The Custom-House. Sub-Treasury, Drexel building and nearly all Wall street are bright with color.

The Chinese have planted the American flag on all the roof-tops in Mott street. Its folds mingle and toss with those of the yellow flag of the Flowery Kirgdom.

Enssell Sage has lavishly decorated his house in Fifth avenue. When last heard from, the Vanderbilt and Gould mansions had not been adorned.

The Police Gazette building prosents a beautiful sight, arrayed as it is with the flags of all nations and a portrait of Gov. Hill occupies a conspicuous place.

The great feature of interest will be the wel-come of the grist from the public schools, who have arranged a grand demonstration and pa-rade in honor of the day.

There will be nearly one hundred and fifty of them in all, two girls having been selected from each of the grammar schools, with thirteen of the older girls from the Normal College and a few children from the primary schools.

ALL IN WHITE.

They will be dressed in pure white, each with a little silk flag on her shoulder, and each carrying a basket of flowers. They will be ranged in a double row on the steps of the City Hall when President Harrison arrives, and when he alights from his carriage they will sing "Hall Columbia," at the same time strewing flowers before him at every step before the line.

The school girls will be read by Miss Annie Alida Abrahams, of the senior class in the Normal College, when the President's party reaches the entrance of the building.

Miss Abrahams is a handsome blonde, of slight but graceful figure, with dark flashing eyes and hair of a tawny topaz hue.

She was unanimously chosen by her classmates to do the honors of the occasion. After reading the ardress she will present an engrossed copy of it to the President.

At the close of the reception in the Governor's room the Committee on States will escort the President to his home, which is at the house of Vice-President Morton during his stay in town.
